Before you invest, you may want to review the Fund's Prospectus and Statement of Additional Information ("SAI"), which contain more information about the Fund and its risks. The current Prospectus and SAI, each dated November 20, 2020, are incorporated by reference into this Summary Prospectus. You can find the Fund's Prospectus, reports to shareholders, and other information about the Fund online at [www.veganetf.com](http://www.veganetf.com). You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to [ETF@usbank.com](mailto:ETF@usbank.com).

**IMPORTANT NOTE:** Beginning on January 1, 2021, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the shareholder reports from your financial intermediary, such as a broker-dealer or bank. Instead, the shareholder reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund shareholder reports in paper, free of charge. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

### **Investment Objective**

The US Vegan Climate ETF (the "Fund") seeks to track the performance, before fees and expenses, of the Beyond Investing US Vegan Climate Index (the "Index").

### **Fees and Expenses of the Fund**

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund ("Shares"). This table and the Example below do not include the brokerage commissions and other fees to financial intermediaries that investors may pay on their purchases and sales of Shares.

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.60%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.60%</b>

### **Expense Example**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$61	\$192	\$335	\$750

### **Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund's performance. For the fiscal period September 9, 2019 (commencement of operations) through July 31, 2020, the Fund's portfolio turnover rate was 18% of the average value of its portfolio.

### **Principal Investment Strategy**

The Fund uses a "passive management" (or indexing) approach to track the performance, before fees and expenses, of the Index. The Index was developed in 2018 by Beyond Advisors IC (the "Index Provider"), the index provider and parent to the Fund's investment adviser, Beyond Investing, LLC (the "Adviser"), and is designed to implement a set of rules that seek to address the concerns of

vegans, animal lovers, and environmentalists by avoiding investments in companies whose activities directly contribute to animal suffering, destruction of the natural environment, and climate change.

*Beyond Investing US Vegan Climate Index*

The Index’s construction begins with the constituents of the Solactive US Large Cap Index, consisting of approximately 500 of the largest U.S.-listed companies (the “Large Cap Equity Universe”). From the Large Cap Equity Universe, companies are excluded from the Index if they derive more than a *de minimis* proportion of their total revenue (generally less than 2%) from products and services directly related to one or more of the following areas of concern (the “Prohibited Activities”):

<i>Animals</i>	<ul style="list-style-type: none"> <li>• Animal testing</li> <li>• Animal-derived products, animal farming, and other exploitation activities</li> <li>• Animals in sport and entertainment</li> <li>• Research, development, and use of genetically engineered animals</li> </ul>
<i>Planet</i>	<ul style="list-style-type: none"> <li>• Extraction or refining, or services principally related to the extraction or refining, of fossil fuels</li> <li>• Burning of fossil fuels for energy production</li> <li>• Other activities having a significant negative environmental impact (<i>e.g.</i>, high carbon intensity activities, high climate change impact, habitat destruction), unless the applicable company undertakes positive initiatives that effectively mitigate those impacts (<i>e.g.</i>, having publicly announced and undertaken policies upon which the company provides regular reporting that enables the public to measure the degree to which the environmental impact has been reduced).</li> </ul>
<i>People</i>	<ul style="list-style-type: none"> <li>• Tobacco products</li> <li>• Armaments and products specifically designed for military and defense uses</li> <li>• Contributions to the abuse of human rights or lack of robust, detailed, and independently published policies covering human rights and child/forced labor</li> </ul>

If a company’s primary business line implicates one or more Prohibited Activities, such company will automatically be excluded from the Index. If a company is engaged in multiple business lines, the identification of Prohibited Activities will be based on the company’s published materials, regulatory filings, websites, and product catalogues. If such additional sources do not objectively determine whether a company is engaged in Prohibited Activities, the company will be asked directly about its engagement in Prohibited Activities. Additionally, financial firms, accounting firms, and business service providers that provide services to companies excluded from the Index due to participation in Prohibited Activities are excluded from the Index if a disproportionately high portion of such service provider’s total revenue or business activities (as compared to the portion of revenue or business activities of other service providers) is from such excluded companies or if such service provider’s services are specifically targeted at companies involved in Prohibited Activities.

The remaining companies in the Large Cap Equity Universe (the “Large Cap Constituents”) are initially market capitalization weighted. All Large Cap Constituents with an initial market capitalization weight greater than 1.5% will have their weight adjusted to ensure that no company’s weight exceeds 5% at the time of each semi-annual reconstitution of the Index and to reallocate excess weight to companies below the 5% threshold.

If after weighting the Large Cap Constituents as described above, the weight of any industry group in the Index would be more than 2% below the weight of the corresponding industry group of the Solactive US Large Cap Index, the Index will add the next largest securities from that industry group in the Solactive US Large & Mid Cap Index that are not engaged in Prohibited Activities (based on the same rules applicable to the Large Cap Constituents), one by one, and weight them based on their market capitalization until the weight of the applicable industry group in the Index is within 0.5% of the weight of the corresponding industry group of the Solactive US Large Cap Index.

As of August 31, 2020, there were 279 companies in the Index and a significant portion of the Index was comprised of companies in the communications services, financial, and information technology sectors.

The Index is reconstituted based on the above-described methodology on the first Wednesday of each June and December, based on data as of ten business days prior to each reconstitution.

*The Fund’s Investment Strategy*

The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of any collateral held from securities lending) will be invested in the component securities of the Index. The Adviser expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index in approximately the same proportion as in the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Fund’s sub-adviser believes it is in the best

interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund generally may invest up to 20% of its total assets (exclusive of any collateral held from securities lending) in securities or other investments not included in the Index, but which the Fund's sub-adviser believes will help the Fund track the Index and that do not derive more than a de minimis proportion of their total revenue from Prohibited Activities. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index.

### **Principal Risks of Investing in the Fund**

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund."

- **Concentration Risk.** The Fund's investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries.
- **Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **ETF Risks.** The Fund is an ETF, and, as a result of an ETF's structure, it is exposed to the following risks:
  - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
  - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
  - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
  - *Trading.* Although Shares are listed for trading on NYSE Arca, Inc. (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Index Risk.** Because the methodology of the Index selects securities of issuers for non-financial reasons, the Fund may underperform the broader equity market or other funds that do not utilize such criteria when selecting investments. Although the Index is designed to avoid investing in companies whose primary business line implicates one or more Prohibited Activities, there is no assurance that the Index or Fund will be able to avoid such securities at all times or that companies that have historically met the Index's criteria will continue to exhibit such characteristics in the future.
- **Large-Capitalization Companies Risk.** The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.

- **Limited Operating History.** The Fund is a recently organized investment company with a limited operating history. As a result, prospective investors have a limited track record or history on which to base their investment decision.
- **Mid-Capitalization Companies Risk.** The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.
- **Passive Investment Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.
- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors.
  - *Communications Services Sector Risk.* Communications services companies are subject to extensive government regulation. The costs of complying with governmental regulations, delays or failure to receive required regulatory approvals, or the enactment of new adverse regulatory requirements may adversely affect the business of such companies. Companies in the communications services sector can also be significantly affected by intense competition, including competition with alternative technologies such as wireless communications (including 5G and other technologies), product compatibility, consumer preferences, rapid product obsolescence, and research and development of new products.
  - *Financial Sector Risk.* This sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis. Insurance companies, in particular, may be significantly affected by changes in interest rates, catastrophic events, price and market competition, the imposition of premium rate caps, or other changes in government regulation or tax law and/or rate regulation, which may have an adverse impact on their profitability. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted. In recent years, cyber attacks and technology malfunctions and failures have become increasingly frequent in this sector and have caused significant losses.
  - *Information Technology Sector Risk.* Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund’s investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and the Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

## Performance

Performance information for the Fund is not included because the Fund did not have a full calendar year of performance prior to the date of this Prospectus. In the future, performance information for the Fund will be presented in this section. Updated performance information is available on the Fund’s website at [www.veganetf.com](http://www.veganetf.com).

## Management

<i>Adviser</i>	Beyond Investing LLC (“Beyond” or the “Adviser”)
<i>Sub-Adviser</i>	Penserra Capital Management, LLC (“Penserra” or the “Sub-Adviser”)
<i>Portfolio Managers</i>	Dustin Lewellyn, CFA, Managing Director of Penserra; Ernesto Tong, CFA, Managing Director of Penserra; and Anand Desai, Associate of Penserra have been portfolio managers of the Fund since its inception in 2019.

**Purchase and Sale of Shares**

Shares are listed on the Exchange, and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 25,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of U.S. cash.

**Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

**Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
